

Maruti Suzuki - Dashboard Input Table

FY15-FY25 | standalone basis where applicable | mix rows are volume mix, not revenue mix

Definition / note	Treatment in this table
Mix shift chart	Use volume mix: Export Volume %, EV Volume %, SUV / UV Volume %. Do not label as revenue mix.
Revenue mix rows	Export Revenue %, EV Revenue %, and SUV Revenue % are not cleanly disclosed and are excluded to avoid estimates.
Capacity utilisation	Proxy based on total sales volume divided by disclosed annual capacity; true production utilisation needs production volume.
Gross margin	Proxy based on 100% minus material cost %. This is not company-disclosed gross margin.
Capex	Annual Report cash-flow based capex; final tie-out should retain the exact line-item definition used in the model.
